# MAGYS 350-GR Generator and Wire Feeder - WS-4R

**Dataliner®**

The MAGYS 350-GR with its wire feeder WS-4R is a "synergic" 3-Phase MIG/MAG with an air cooled system. Its heavy duty design and high duty cycle make it ideal for industrial environments welding steel, stainless-steel and aluminium. The cables, available either in 5 or 10 meters, are perfectly suited for intensive work up to ø1.6.

## 4 MODES

### ■ 2T / 4T

■ **Spot:** Welding with adjustable spot diameter

■ **Delay:** Intermittent welding mode

## SYNERGIC OR MANUAL

More than 1000 parameters managed by micro processor.

■ **Synergic mode:** The wire speed parameters can be set up directly and easily for an optimum result by just setting-up:

- The wire type
- The wire diameter
- The power, with its two switches

**MAGYS 350- GR** will automatically control:

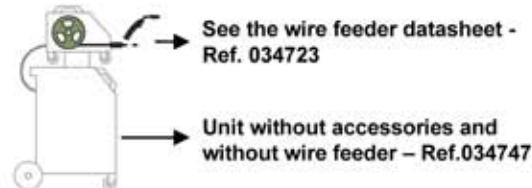

- Optimum wire speed
- The pre-gas / post-gas
- Burn back

■ **Manual mode:** Enables manual control of the wire speed

## HEAVY DUTY DESIGN AND ENGINEERING

- A 75W separate wire feeder and 4 drive rollers
- Robust build to suit industrial requirements
- Gas bottle support up to 10m³ (50l)
- 4 eye bolts for lifting the machine
- Heavy duty reinforced wheels for good mobility

## COMPREHENSIVE AND INTUITIVE INTERFACE

■ **Material Thickness Test Function**, the MAGYS will show the thickness that can be welded according to the parameters set.

■ **20 positions** to enable precise settings from 40A to 350A

■ **Arc control:** Manual or automatic adjustment of the arc to optimize its stability minimising splatter according to the metal and to the gas used.
